## Inspection fee

Fixed fee of €150, including max. 2 hours of inspection. This fee will only be charged in case of no repair.

## Repair work

Repair work rate is €100/h

## General conditions

- After termination of repair a service calibration record is made including several checks:
  - Annual maintenance
  - Visual Damage
  - Arc count
  - Splice condition
  - Splice result
- Consumable cost can be added to service repair. e.g. screws, ball bearings,... with a max. of €7,5/service.
- Full annual service contains 4hrs work. If additional work is needed an additional repair rate of €100/h will be charged.
- A full annual service per year is recommended. If extra service is needed in the same year a cost of €450/service will be charged.
- The estimated duration of a service call will be confirmed as from the moment a PO number is known.
- A service call cannot be completed without a PO number.
- Splicers must be brought in in the original yellow cases. Devices that arrive in cardboard boxes will be returned to the customer. For cleavers that do not arrive in the original box, a new box will be charged.
- If cleaver is brought in with the splicer but not mentioned separately on the service sheet, it will be serviced and charged.

## Warranty

Factory warranty is 2 years for fusion splicer and cleaver (if used correctly).

Warranty Period for repairing parts:

- 0 to 12 months: Optical Fiber Cleaver or Ribbon Fiber Stripper
- 0 to 24 months: Electric parts (Heater, Motor, LCD monitor, Camera FPC etc.) or Electric unit including electric parts
- 0 to 36 months: Other parts not mentioned above

Warranty Period for labour cost:

- 0 to 24 months: Within warranty for labour cost
- After 25 months: Out of warranty for labour cost

The warranty does not cover consumables, such as electrodes, battery, blade, sponge rubber etc. Routine splicer servicing or cleaning is not covered under warranty.
